Notice Regarding Container Change for Genuine Cartridge Grease for LHL-X100-7 and LHL-X100-2

Dear Sir or Madam,

We would like to express our sincere gratitude for your continued patronage of our products over the years.

Due to the situation in the Middle East, there are concerns regarding the availability of raw materials (resin). The LUBE Group considers maintaining a stable supply to our customers our top priority, and we will be standardizing the color of the genuine cartridge grease containers.

Please note that this change pertains only to the appearance of the container; there will be no changes to the product's shape, quality, performance, materials, net content, or GHS label.

We appreciate your understanding and cooperation.

Sincerely

Details
